Concealer Conceptions

Concealers are miracle products that can cover any surprise blemish or unsightly tattoo. **Dermablend Cover Crème**, \$33, is a wonder concealer because of its thick coverage and stay-put formula. It comes in many different tones of color to support the various browns that exist throughout the subcontinent, making it a perfect choice for wedding day perfection. It also acts as a terrific sunscreen with SPF 30. Dermablend is a world-renowned leader of corrective makeup and can be used all over your body. Dermablend.com

Another *Bibi* favorite is the **Conceal FX Camouflage Concealer**, \$27. Loaded with skin-friendly peptides, ceramides and emollients that soften, soothe and repair delicate eye skin, the concealer is a must-have for undereye circles. No only does it cover flawlessly, but the buildable coverage doesn't clump into fine lines and wrinkles. CoverFX.com

Bronzed FX's Mineral Bronzing Powder, \$26, similarly exemplifies perfection. Weddings are an opportunity to showcase your sun-kissed shine. Bronzed FX has gone to extreme lengths to ensure an oil-free, fragrance-free, wax-free and natural mineral powder with amazing shades of color that enhance brown skintones for a healthy glow or for contouring. Our favorite is the pink-gold hue of Pink Topaz that really compliments olive skin. Coverfx.com

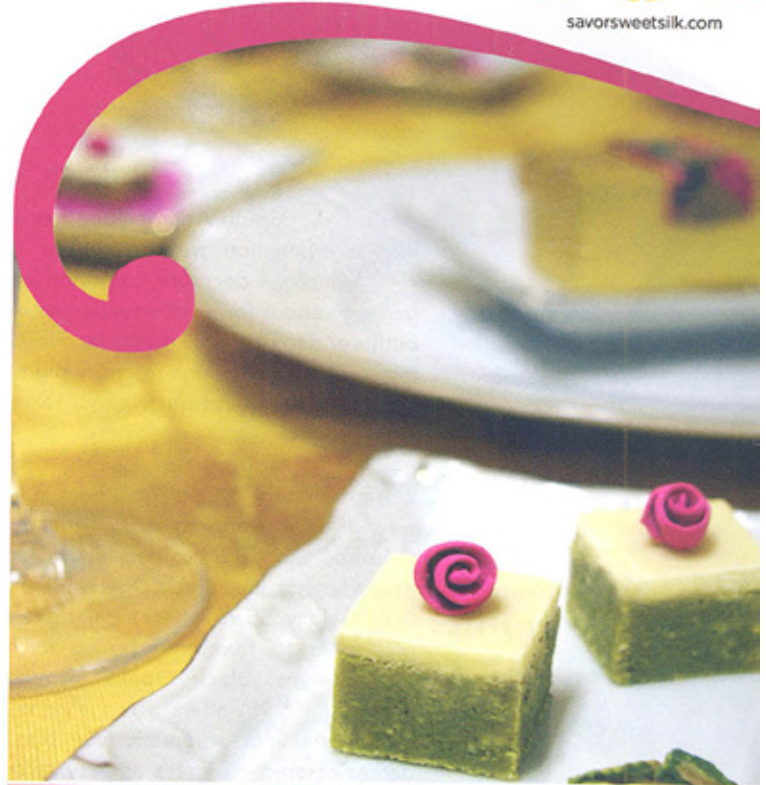

On your special day, treat your guests with a petite piece of confectionary art, which will excite one's palate with a melange of flavors. Each sweet is individually hand-crafted using the finest and most exotic ingredients from all over the world.
